# VISUAL MUSIC

## Définition du concept :

**SPiR** mixes original created video sources, playing on a midi keyboard, with digital and analogue mixers, integrating seamlessly with short pre-produced video loops, longer atmospheric naps, live feed cameras, and video feedback.

**SPiR** creates his own images and video sound, inspired by the theme and atmosphere of the artist and song, installation or venue, using texture, colors, speed, repetition and flow of the images. His multi layered video style is one that pushes the line between abstraction and reality. Multi layering of images draws the spectator into a universe which embodies the music, an invitation to a place of personal interpretation.

**SPiR** composes with a G4 titanium, an Oxygen8 midi keyboard, Arkaos, a Numark VAM2000 analogue video mixer, an Edirol M4 digital video mixer, an archer RS effects switcher, 5 dv cameras and a LTO AMX-140FX audio mixer, to create two separate or combined video signals channeled to up to 6 projectors and 8 TVs placed strategically surrounding the performance creating an environment that invites multi sensory participation.

**SPiR** works in close collaboration with each artist, event organizer or club owner to produce a truly unique experience that will motivate, inspire and meet the needs and goals of each show.

**VJ**: He moves fluidly in club circles with the ability to mix on multiple styles of electronic music from Drum n' Bass to House to Down tempo.

**INSTALLATIONS**: With the FuseLab collective he creates experimental installations for underground venues, chill out spaces or festivals of film and multimedia.

**EVENTS D'ENTREPRISE**: spontaneous live video creation and projection give corporate events the artistic edge.

**FUSE FACTORY LIVE** : Spir works with the band Fuse Factory for live act shows on festival and concert stages.
